

POLICY FOR THE ENVIRONMENT, QUALITY AND SAFETY OF PRODUCTS

Masterpack S.p.a. operates in full awareness of its responsibility towards customers, its collaborators and suppliers; recognizes that environmental protection is essential for the quality of life of today's and future generations and for this reason it aims to pursue sustainable development by safeguarding and improving environmental conditions and the responsible use of natural resources.

In order to be recognized as a responsible economic institution and to strengthen its leadership on the market, Masterpack s.p.a has included constant improvement objectives within its planning by making adequate financial resources to ensure health and safety in its workplaces, hygiene and safety of its products in compliance with current laws and international voluntary standards.

Goals

Masterpack S.p.A identifies the following as the main goals of the policy:

- the protection of the environment and the continuous improvement of its performances, minimizing any form of impact of its activities on the external environment, optimizing the use of energy resources, avoiding waste, and focusing on forms of renewable energy
- strategic planning of objectives and programs, monitoring and control, through identification of risks and opportunities, which considers legislative evolution, technical opportunities and the social and economic context, in constant dialogue with the stakeholders
- the design and the production of increasingly innovative and sustainable products
- the constant improvement of products, processes and plant efficiency through the adoption of the best available technologies
- the constant involvement of its collaborators for the growth and development of the organization and company performance in line with the new and different needs of the customer, in terms of product, service and assistance

Tools

Masterpack S.p.A. intends to achieve the objectives indicated above through the following actions:

- Ensure that its activities are carried out in compliance with current laws, regulations and sector regulations;
- Constantly purposefully allocate human, financial, technical and infrastructural resources necessary to achieve the goals
- Ensure that the company policy and the related system are understood, implemented and maintained at all levels of the organization and that the system is supported by periodic and systematic training activities.

Communication and review

This policy is made available to the organizational structure by posting it on company noticeboards and communicated to the public via the company website; is defined and subject to periodic review following the annual management review with the aim of maintaining the system valid and effective in the face of internal or external changes to the organisation.

Any modification or innovation of the product/process must be evaluated to implement appropriate measures to prevent, control or reduce environmental impact.

The implementation of the above will allow the achievement of the established objectives and will create the basis for further improvements that will allow the company to effectively face future market challenges.
